PROJECT REPORT

PROJECT TITLE:

Travel Inspiration Static Website

Student Name: Dhanapal p

RegistrationNumber: 732424149010

College Name: Sasurie college of engineering

Department: BE.CSE(CS)

Year/Semester: II/III

Submission Date: 22.12.2025

Project Title:

Travel Inspiration Static Website

1. Abstract

The **Travel Inspiration Static Website** is a simple one-page static website developed using **HTML and CSS**.
The main aim of this project is to showcase beautiful travel destinations and inspire users to explore new places.
The website contains image galleries, place cards, and short descriptions, providing an attractive and informative user experience.
This project helps in understanding the basics of web design, layout structuring, and styling using CSS.

2. Introduction

Travel plays an important role in refreshing the mind and exploring new cultures.
Many people look for inspiration before planning their trips.
This project focuses on creating a **static travel inspiration website** that visually presents popular tourist destinations.

The website does not use any backend or database and works completely on the frontend using HTML and CSS.
It is suitable for beginners to understand web page structure, styling, and responsive layout concepts.
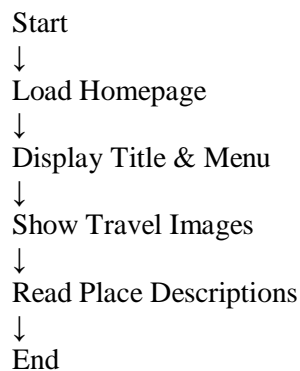

3.Objectives

The main objectives of this project are:

1. To design a simple and attractive static website
2. To display popular travel destinations with images
3. To provide short descriptions for each place
4. To understand HTML structure and CSS styling
5. To improve basic web development skills

4. Tools and Technologies

- **Frontend Language:** HTML,

- **Styling:** CSS

- **Editor / IDE:** VS Code

- **Browser:** Google Chrome / Edge

5. Flowchart of Project Workflow

Start
↓
Load Homepage
↓
Display Title & Menu
↓
Show Travel Images
↓
Read Place Descriptions
↓
End

6. Source Code

- **index.html** – Contains the webpage structure

- **CSS styles** – Used for colors, borders, alignment, and layout

- **Images** – Used to display tourist destinations

Html code:

```html
<!DOCTYPE html>
<html lang="en">
<head >
    <title>
        Travel
    </title>
    <link rel="icon" href="TRAVAL INSPIRATION/images.jfif">
</head>
```

```html
<body >
    <style>

    </style>

    <center>
        <style>
            h1{
                background-color:rgb(200, 255, 0) ;
                padding: 0px;
                border-color: rgb(1, 8, 7);
                border-width: 5px;
                border-style: solid;

            }
            li{
                display: inline;
                background-color: rgb(146, 15, 54);
                color: rgb(214, 224, 228);
                padding: 5px;

            }
            li:hover{
                color: aliceblue;
                cursor: pointer;
            }
            ul{
                margin-left: 60%;

            }
            .box{
                border-color: rgb(233, 126, 180);
                border-width: 10px;
                border-style: solid;
                display: inline-block;
                width: 282px;
                margin: 30px;
                padding: 30px;

            }

        </style>
    <h1 style="color: rgb(158, 16, 115);;">

    <p>
    This image showcases famous landmarks from different parts of the world.
Each structure represents the culture, history, and creativity of its country.
From ancient wonders to modern architectural marvels, they attract millions of visitors.
These places remind us of human achievement and global diversity.
Traveling to such destinations creates unforgettable memories and inspiration.
</p>
</div>
</body>
</html>
```
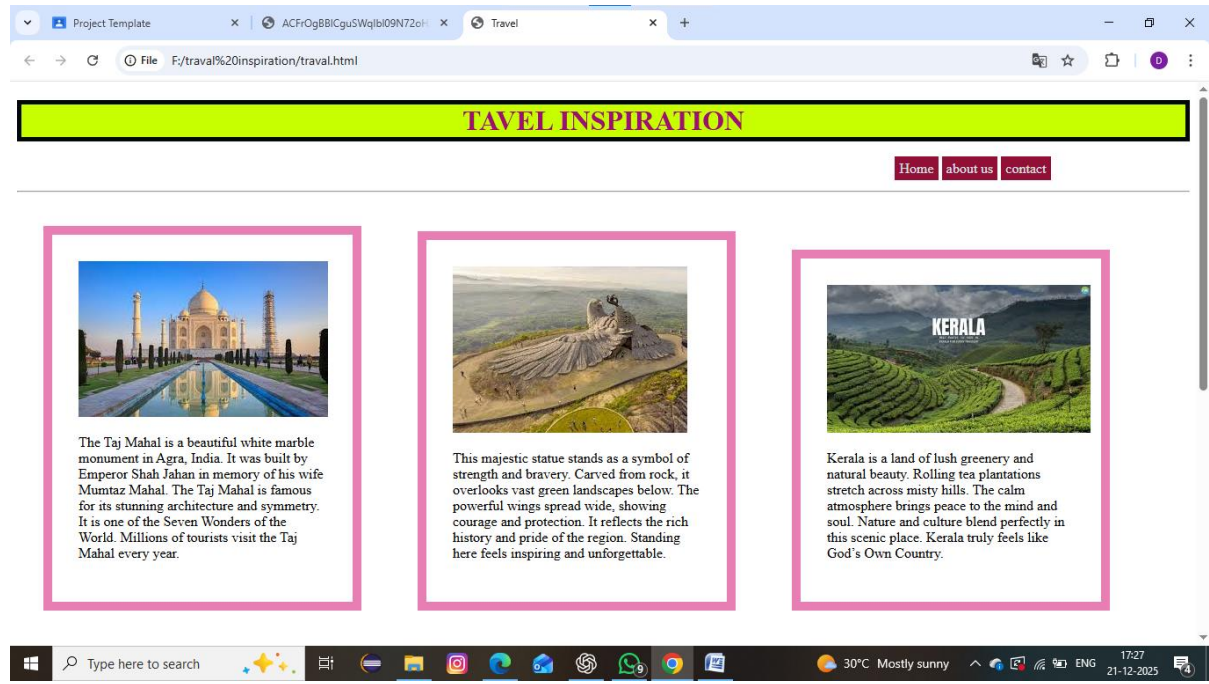

7. Sample Output / Screenshots

8. Conclusion

The **Travel Inspiration Static Website** successfully demonstrates the creation of a static webpage using HTML and CSS.
This project improves understanding of webpage structure, styling, and layout design.
It serves as a strong foundation for learning advanced web technologies like JavaScript and backend development in the future.
